

## 557. Reverse Words in a String III

♥ Add to List ▾

Description Hints Submissions Solutions

1 line Python (<https://discuss.leetcode.com/topic/85752/1-line-python>)

Notes

Straightforward one.

```
class Solution(object):
    def reverseWords(self, s):
        """
        :type s: str
        :rtype: str
        """
        return " ".join(map(lambda x: x[::-1], s.split()))
```
